

On-site quenching

DHF has been providing on-site quenching service at the customers plant to large products, of which size or weight are far beyond our capacity to handle or too big to transport between our and customers plants by dispatching engineers with IH equipment.

Weight limit DHF can process at own plants

1. Large roll (locally transferred device), over 10T
2. Max. weight ; less than 10 ton
3. Large gear (locally transferred device), over 10T
4. The internal facility tolerance range is (tiuck cranes, etc. are used) 10T

Regarding more than 10 ton products, DHF will send engineers with IH quenching equipment to the customers' plant to implement the service based upon customer' request.

Bending roll
60,000kg

Hot roll for papermaking
43,000kg
